## The Group for Beardless Irises

Issue No. 1

Spring 2005

---

## CHAIRMAN'S MESSAGE.

The time has come again for the Chairman to do his little stint in offering all the members some encouragement. In all honesty that is really all I can do. The hard work is carried out by my fellow officers to whom I must offer sincere thanks for everything they do.

Encouragement takes many forms, from coercion to enticement, and I'm not much good at either. However, I want to reiterate what I said before that the way forward lies within the seed pod. I wish to encourage you to take advantage of fellow officer Philip Allery who has garnered a fine collection of seeds. Many thanks are to him for approaching the donors whose generosity has resulted in some really modern hybrid seeds being offered to all members. Even if you do not, as a rule, grow plants from seed, now is the time to start, particularly as the Group has been invited to take part in the work of Dr. Charles Jenkins who is one of the leading American hybridists of spurias. In all spheres of life advancement is carried on the shoulders of such pioneers. Classic examples in the non-bearded Iris field is the great evolution following work carried out by the late Dr. Currier McEwen, Robert Hollingworth, Dr. Tomas Tamberg, Tony Huber, Dave Niswonger and innumerable others.

Once a hybridising programme has started and we are into the second and third generations, unless I am greatly mistaken, every seed counts. Out of several hundred seeds just one might carry several of the desired improvements. We must not be discouraged in Britain that we do not have space or money for the wide acreage that the American breeders have at their disposal to grow the vast numbers of seedlings that accrue in the second or third generation. We can, however, do our bit by growing the valuable seeds offered by our donors. Consider our small plots to be part of a greater trial ground. That is the little bit of encouragement that I am trying to convey to you.

Best wishes for your efforts in 2005. Please remember to maintain records and send articles to Brita telling us of your achievements.

*Raymond Bomford*

## SECRETARY'S NOTES

We do hope you all approved of Brita's first Review and are rushing to renew your subscriptions to make sure of the next one. There is no doubt that some colour is a great help when it comes to deciding if the plant in your garden could even remotely be true to the name on the label beside it so it will be worth while making sure that you keep your back issues for reference.

---

And to try and encourage more of you to do some breeding of all kinds of beardless irises for yourselves, Philip Allery has taken over as seeds officer. He is very enthusiastic and has great plans in mind so buy from him now and pollinate like mad in the summer so that you can offer him plenty of seeds for next season.

This has been a patchy winter with some areas almost permanently under water and some very dry with high winds almost everywhere. With a bad leg, I failed to get my Evansias properly dealt with last summer and they have taken an awful battering from the gales. It will be interesting when show times come round again. You will see when some nurseries will have their best displays to visit and buy. It could be worth while replacing the plants you have cherished for so long.

And Brita will be anxious to hear of your successes and failures over the last couple of years so do write and tell her. After all, the winter hasn't been so bad with the unguicularis flowering well and even some reticulatas showing off. I brought some rather over-the-top 'Natshas' indoors to pollinate and they smelt lovely; quite a good blue in colour, too. Probably a bit late for seed, but time will tell.

Best wishes for the coming season.

*Anne Blanco White*

## Treasurer/Membership Secretary Report Spring 2005

The response to the first issue of *The Review* has been very encouraging. Thank you for all the kind comments which arrived with your subs. I forwarded as many as I could to Brita as she clearly deserves the praise for all her hard work.

On the membership side, we nominally started this year with a membership list of 110. However, after a 2-year subscription holiday it was bound to contain some who didn't want to renew, especially as the list included several who were already in arrears. At the time of writing we have received subscriptions from 49 paying members (not including non-paying partners) and a realistic total of 60 seems feasible once this reminder is sent out. We are not planning to keep non-paying members on the mailing list after this Newsletter as clearly we can use the funds to offer a better service to the paying members. Just to remind you subscriptions are £4.00 for UK and EU (elsewhere **£4.50**) payable to ***The Group for Beardless Irises*** and sent to **The Membership Secretary, GBI, Aulden Farm, Aulden, Leominster HR6 0JTI.**

The Group is in a reasonable financial position – the bank account stands at just over £1000. So the main challenge of the Group is not so much financial as the need to grow members as well as irises. The last

---

---

*Review* was printed by ourselves as the low print run made the use of a commercial printer uneconomic. We hope to reverse this situation and that will depend on how we promote ourselves. We would welcome any helpful suggestions. If you are a member of a garden club or hardy plant group and would like a talk this autumn/winter on Beardless Irises, please let me know. Alternatively, if you are happy to give the talk yourself – don't forget that if you are a BIS member you can borrow slides from the BIS slide library.

Finally, let me congratulate Brita for the Gold her Hardy Plant Group gained in the Dundee autumn show - I know she put a lot of work in. We are very lucky to have her as Editor.

*Alun Whitehead*

### Editor's Blushes

All this praise is too much but lovely, many thanks.

I would particularly like to thank all the seed donors for their time collecting, cleaning, packaging and then sending their iris seed. Also, many thanks to the nurseries who have replied to the idea of having an Iris Day. These are advertised here and hopefully next year we will have more. Other nursery owners would be pleased to talk to enthusiasts at bloom time. Why not keep a note of the best date for flowering in your garden/nursery this summer and let me know if you would like to have an Iris Day in 2006. Alternatively send me interesting details of your irises and when it would be a good time to visit. Although we are the Group for Beardless Irises, I'm happy to advertise an Iris Event.

Other gardens are open to the public during iris time under the "NGS, yellow book" scheme, and they would be pleased to talk about their plants and growing methods and answer your questions.

It is impossible to support everything but perhaps you could attend an Iris Day, buy plants or seeds and give us your support. Better still, lots of Brownie points for signing up an enthusiastic new member.

*Brita Carson*

## **IRIS DAYS and IRIS EVENTS**

### **HIDDEN VALLEY GARDENS**

Treesmill, Nr Par, Cornwall, PL24 2TU (Tel 01208 873225)

[www.hiddenvalleygardens.co.uk](http://www.hiddenvalleygardens.co.uk); email [hiddenvalleygardens@yahoo.co.uk](mailto:hiddenvalleygardens@yahoo.co.uk)

On **Saturday June 4th at 11.00 am OR at 2.30 pm**. Tricia Howard looks forward to visitors for chat and tour of the garden (Tea/coffee/eats to buy) She would appreciate a call or email to know numbers. Only 15 mins from the Eden Project and other gardens of interest and B&B also available.

---

Make it a weekend visit. From A390 between Lostwithiel & St Blazey, take B3269 signed Fowey, within 200m fork right, signed Treemill and then continue following the signs.

### **CLAIRE AUSTIN HARDY PLANTS**

The Stone House, Coppice Green Lane, Cramp Pool, Shifnal, Shropshire TF11 8PE. Tel 01952 463 700. [www.claireaustin-hardyplants.co.uk](http://www.claireaustin-hardyplants.co.uk)  
Directions can be obtained from the office, or copy from our website.  
On **Wed June 8th at 2.00 pm**, meet for a tour of the now very settled beds of irises. (tea/coffee/biscuits/cake to buy or bring your own)

### **IRIS of SISSINGHURST**

Plummers Farmhouse, Sissinghurst, Kent, TN17 2JP  
(Tel 01580 715137) email, [irisofs@aol.com](mailto:irisofs@aol.com).  
[www.irisofsissinghurst.com](http://www.irisofsissinghurst.com); check website for directions  
Margaret Roberts will be pleased to talk to other iris enthusiasts on either **June 23rd or 24th**, either morning or afternoon.

### **TINPENNY PLANTS**

Tinpenny Farm, Fiddington, Tewkesbury, Gloucestershire, GL20 7BJ. (Tel. 01684 292668)  
Elaine Horton would be pleased to talk to members about irises and particularly from her own experience of 'growing in hard clay', any Tues, Weds or Thurs. She is also available to give talks to Groups.

### **BROADLEIGH GARDENS**

Bishops Hull, Tauton, Somerset TA4 1AE, (Tel 01823 286231)  
[www.broadleighbulbs.co.uk](http://www.broadleighbulbs.co.uk); details for opening.  
There is very limited parking here so Lady Skelmersdale suggests individual visits; April for DBIs, May for PCIs, or water irises in June.

### **KELWAYS**

Langport, Somerset, TA10 9EZ, (Tel 01458 250521)  
Email [sales@kelways.co.uk](mailto:sales@kelways.co.uk)  
Kelways have just replanted their collection of ensatas and sibiricas and suggest 2006 for beardless but plenty of other things to see this year.

### **OPEN DAY Saturday June 11th, Leiston, Suffolk.**

Invitation to all BIS, GBI members and members of any horticultural clubs to meet iris personalities and hopefully enrol new members who live in Essex and Suffolk. There will be a display, short talks in morning and in the afternoon and if possible some irises on display. Barry Emmerson has a nearby allotment and visitors will be welcome to visit his irises. For more information and directions get in touch with Berney Baughen at [<berney@baughen.fsworld.co.uk>](mailto:berney@baughen.fsworld.co.uk)

---

## NGS DAYS

### AULDEN FARM – TREASURER’S GARDEN

Aulden, Leominster, Herefordshire HR6 0JT (Tel 01568 720129)

www.auldenfarm.co.uk: email <cat@auldenfarm.co.uk>

on **May 29 & July 3rd**, depending on the season there could be lots of *I. sibirica*, *spuria* and *ensata* in flower. Members are also welcome to visit the nursery on Tues & Thurs, during summer months for iris chat.

### GARDEN of SEED OFFICER—MARGARET CRIDDLE

5 Storeys Lane, Burgh-le-Marsh, Skegness, Lincs., PE24 5LR

Tel 01754 811173; email mc.iris@mailbox.tv

Margaret’s Open Days are **April 3rd & 24th: May 1st, 8th, 15th, 22nd & 29th: June 5th**. She would be happy to give members more time on other days, but not Sundays. Arrange time by phone or email. See Lophiris in April & May: Sibiricas in May & June: PCI’s in May: Louisianas in May: Laevigatas in May & June: Spurias in May & June.

### THE IRIS GARDEN

Clive Russell, Yard House, Pilsdon, Bridport, DT6 5PA

(Tel or fax: 01308 868797) email <Theirisgarden@aol.com>

Clive Russell has recently moved to the address above and as most of his beardless irises are in pots, he is not having an Iris Day, but if you would like to call, ’phone, email or write first (enclose a SAE).

### LINGEN NURSERIES June 11th & 12th—Open Days

Lingen, Bucknell, Shropshire, SY7 0DY (Tel 01544 267720)

www.lingennursery.co.uk: email

<kim&maggie@lingen.freeseve.co.uk> Kim Davis holds a National Collection for *I. sibirica*.

### KENT GROUP

All Members, but especially those from the SE, keep watching the Kent website to know what and where iris events & shows are taking place.

www.kentiris.org.uk

### THE WEST & MIDLANDS IRIS GROUP

Why not visit the Group’s stand at the Malvern Spring Gardening Show held on **13<sup>th</sup>, 14<sup>th</sup> and 15<sup>th</sup> May**, or the Group’s Annual Show at Cleeton St. Mary Village Hall, open to the public at **2.00 pm on 28<sup>th</sup> May**, when plants will be on sale.

**October 2 at STOCKTON BURY GARDENS at 2.00 pm.**

Meeting at Stockton Bury gardens and then going on to Aulden Farm where plants from Wisley Trials will be available to buy. There is also a "bring & share tea". For further information contact Mrs. Beryl

---

## SURPLUS PLANTS for SALE from WISLEY

Seed Sowing isn't everyone's addiction and perhaps you would rather buy plants. This is an excellent way to get guaranteed named plants which are probably not easily found in the nurseries.

When the growing trials at Wisley come to the end of their 'trial', there are surplus plants offered for sale. These are offered first to BIS members. This must be an essential reason to join the British Iris Society (BIS) This summer plants from the Wetland Trials come to the end of their trial and any surplus plants donated to the BIS will be on sale to BIS members.

But before that there are others to drool over. These are the surplus plants from the trials of the smaller bearded irises 2001–2004 and you'll find them on the BIS web site. Please note you must be a member of the BIS. <[www.britishirissociety.org.uk/membersplantoffer.html](http://www.britishirissociety.org.uk/membersplantoffer.html)>

And here are some that members of the GBI can buy this spring.

*Iris* 'Russian White' (spuria)

*Iris ensata* 'Aldridge Snowmaiden'

*Iris ensata* 'Aldridge Visitor'

*Iris ensata* 'Benitsubaki'

*Iris ensata* 'Flying Tiger'

*Iris ensata* 'Katy Mendez'

*Iris ensata* 'Lasting Pleasure'

*Iris ensata* 'Magic Opal'

*Iris ensata* 'Ol' Man River'

*Iris ensata* 'Returning Tide'

*I.* 'Russian White' is £3.50 + postage: All *ensatas* are £2.50 + postage. If there is not sufficient supply of plants include substitutes if you would like to receive them.

Spring is a good planting time so send your order to Alun Whitehead, Aulden Farm, Aulden, Leominster, Herefordshire HR6 0JT. Or email <[cat@auldenfarm.co.uk](mailto:cat@auldenfarm.co.uk)> or Tel 01568 720129.

Alun needs a cheque for plants payable to the 'Group for Beardless Irises' and one to himself for postage. Please pay promptly on receipt of plants. OR you can find out from Alun, in advance, the most likely cost of postage. Phone or email.

Anyone interested in plants from the Wetland Trials can email Alun for the list of plants available in late summer. Non BIS members may be able to buy what remains, this time next year.

---

---

## SEED DISTRIBUTION—March 2005

You may be wondering why I have appeared on the scene again after the hiatus of the past two years but I feel strongly that I owe it to the memory of two of my early mentors, the late Dr. Schushi Hirao and the late Dr. Currier McEwen, to repay a little of the vital practical encouragement they gave me, over twenty years ago, to grow Japanese irises and, in particular, sow iris seed. My message to all, particularly newcomers to the Group, is that any improvement in our exciting range of beardless irises must come from hybridising, chance or planned, and that inevitably means sowing the seed produced. You could be a part of that process, and from it derive much interest and satisfaction; an antidote, in part, to the stresses of our present-day society.

The extent of the Seed list enclosed with this newsletter is due to the generosity of many friends and acquaintances, whose help is very much appreciated. If space permits I hope to acknowledge them individually in The Review to be published later in the year. I draw your attention in particular to the invitation from Dr. Charles Jenkins of Arizona, one of the world's leading *Spuria* hybridists, to take part in trials using seeds of F2 crosses of *I. lactea* with several *spuria* cultivars.

The purpose of this distribution is twofold. First is the invitation to members to sow F2 hand-pollinated seed of *I. lactea* x various *spuria* hybrids generously supplied by Dr. Charles Jenkins of Arizona and to observe the seedlings produced.

The second is to make a representative selection of seeds, some not included on the B.I.S. list, available to members, particularly those who have recently joined the Group. We would also like to encourage everyone to join the parent Society (B.I.S.) and the Species and Regional Groups. Such members would then have an opportunity to meet others with similar interests; and to have access to a much wider selection of seeds, plants and informative publications.

The seed offered has been collected in 2004. We hope the seeds are what they say they are but they do come from many sources and it is not always possible to check naming accuracy.

The Seed List – First let me express thanks to Mrs. Margaret Criddle, Seed Distribution Officer for the B.I.S. for taking on the seed distribution for the Group as a temporary measure when the previous office holder, Gary Lewis decided to move to France. Margaret's decision in July to retire from this office meant that her's would be a "hard act to follow" and I am happy to acknowledge her continuing cooperation and support.

It has been said **"there's more to an iris than meets the eye"**.

---

It is certainly true of the work in preparing a seed list and I would like to thank our Secretary, Mrs. Anne Blanco White for overseeing my first effort. There may well be mistakes along the line, but for the time being you're stuck with me, no other person having volunteered to fill the vacancy, and as I'm nearing 85 someone younger better think quickly about succeeding me.

*Philip Allery*

Donors of seed—TH Canada is Tony Huber; CD UK is Caroline Derbyshire; AW UK is Alun Whitehead; JD USA is Jim Dunlop; PA UK is Philip Allery; and BCJ USA is Charles Jenkins of Arizona.

OP—open pollinated; HP—hand pollinated; sdg—seedling.
