Members of The Group for Beardless Irises may purchase seed for £1.00 per packet or for 10 packets including postage :

£7 UK

Non-UK - please email.

Orders will be filled as they are received. Any seed in short supply will be rationed. No responsibility can be accepted for the results as seeds are received from different sources and it is not always possible to check naming accuracy. Please note that cultivars do not come true from seed and cannot be called by the parent's name no matter how similar they may look. Vegetative propagation is the only method of acquiring a named cultivar. Any seed not marked HP has been Open Pollinated. D and T stand for Diploid and Tetraploid.

Please order by number and retain the Seed List for reference: some seed may only be identified by the number on the seed packet. Please list substitutes if acceptable, or tick the box if you do not wish any substitutes.

This list only includes seed collected in 2022. We do have lots of interesting older seeds which will still be viable. It would be good to pass these on to anyone interested in growing irises. Please enquire if you are searching for something special.

Thanks!

Very many thanks to all the Seed Donors for the time spent collecting, cleaning and sending the seed for the Seed Distribution.

The GBI seed scheme has always enjoyed an international element. With the changes to the seed import regulations in many countries, including the UK, this is naturally having a negative effect and the scheme may no longer be viable in future years.

Anyone ordering seed from outside the UK should be aware of the risk. We will try to help where we can, but the interpretation of the customs regulations appears inconsistent and constantly changing.
